LinHES - Bug # 126: /etc/rc.shutdown on FE only

Status:	Closed	**Priority:**	Normal
Author:	mihanson	**Category:**	
Created:	01/18/2009	**Assignee:**	jams
Updated:	03/20/2010	**Due date:**	12/31/1969
Description:	When shuting down or rebooting a .05 based FE only, an error appears. /etc/rc.shutdown Line 25: /etc/rc.d/mysqld: File or directory does not exist. I assume this is because the mysql db is located on another machine.

Adding an ! in front of the mysqld of /etc/rc.conf, line 111 makes the issue go away.
