Please start the frontend from an xterm and try playing a DVD. Note any errors when it crashes. I've tested a unencrypted and a commercial DVD w/ R6 w/o issue. If it is a commercial DVD, have you install libdvdcss?

I've seen similar issues with the built in player and a DVD made with MythArchive.

I installed xine using pacman, but didn't end up with good keymaps for the app.

There is a ticket open on MythTV for DVD playback:
