

## LinHES - Bug # 118: add ext4 filesystem

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Human	<b>Category:</b>	
<b>Created:</b>	01/13/2009	<b>Assignee:</b>	jams
<b>Updated:</b>	03/20/2010	<b>Due date:</b>	12/31/1969
<b>Description:</b>	ext4 is stable as of kernel 2.6.28 (current R6 ISO contains 2.6.27). Consider adding ext4 as an option for LinHES.		

### History

Everything is now in place, just need to update the kernel.

**06/18/2009 04:13 pm - Human**

Just installed on a Dragon 2.x system with ext4 as / and /myth, and post-install reboot shows "No bootable device -- please insert boot disk and press any key"

I'll re-try with ext3 to make sure the problem isn't more fundamental than FS type.

I had the same problem with ext3, so whatever is wrong is not ext4-related.
