

LinHES - Bug # 139: lighttpd not taking requests

Status:	Closed	Priority:	Normal
Author:	mjl	Category:	
Created:	01/19/2009	Assignee:	cecil
Updated:	08/31/2016	Due date:	12/31/1969
Description:	I can ping the box however it won't cough up a web page. I see content in /data/srv/httpd/htdocs/ Once I set the document root in /etc/lighttpd/lighttpd.conf it gives the home index R5.5 page. Trying for mythweb give a 403 permissions error. Some of the other pages work.

Try the following:

```
sudo pacman -Sy
```

```
sudo pacman -S lighttpd
```

```
cd /etc/lighttpd/
```

```
ls
```

Do you see multiple .confs? If so, copy the latest version as lighttpd.conf.

```
sudo sv restart lighttpd
```

01/26/2009 09:33 pm - mjl

403 - Forbidden

```
ls /etc/lighttpd/
```

```
lighttpd.conf
```

```
sudo sv restart lighttpd
```

```
ok: run: lighttpd: (pid 5817) 1s
```

Still get: 403 - Forbidden :(

Still have troubles with lf & cr in flyspray too.

01/26/2009 11:47 pm - cecil

Did you upgrade lighttpd?

01/27/2009 12:19 am - mjl

```
sudo pacman -Sy
```

```
sudo pacman -S lighttpd
```

```
cd /etc/lighttpd/
```

```
ls
```

I thought I did but will re-run tomorrow night. It appeared to have gone through the steps but the lf/cr makes things appear differently in the comment section than when they were in the posted section. Does not Flyspray like Iceweasle?

Also only had one .conf file

Sorry, Thought I had replied but guess it didn't stick to the flypaper..

Yes, I did a repeat to doing the upgrade of the web server but I don't recall the messages. Now when I try, I am getting an error of "not found in sync db"
