Description:	Hi
	Because of the different working base system from Debian and moving to arch, is there an option to have a list of proposed "optional" tools / applications that will be available for LinHES?
	It was mentioned that arch is i686 however it is planned to have LinHES be setup for i586 which will make some "normal" stuff not work correctly if pulled from arch sources.
	I am certain that many folks besides myself use or would like to use their myth machine for other tasks besides watching tv. It also increases the return value on an investment to be multi-functional. A 9/16 wrench will work on a 9/16 nut/bolt where a cresent wrench will work on many sizes.
	To start the request list:
	imagemagick
	rsync
	ftp
	pppconfig
	mgetty
	lynx
	webmin
	firefox (or eq)
	thunderbird (or eq)
	openoffice
	dia
	frozenbubbles
	childsplay
	gramps
	gedit
	cups
	espeak
	festival
	I have a "few" other also :)
	Thanks
	Mike
