Which version of linhes-theme do you have installed (pacman -Qs linhes-theme)? I don't think linhes-theme-1-7 should have this problem.

Whatever came out of the box with 6.00.06. I need to re do the install, but the test machine is currently running R5.5 so that I can get some data on it and test the upgrade process. It'll be at least a couple hours before I'm back there.

OK, I've got things back where they were. Looks like it's linhes-theme-1-3 at the moment.

Fixed after running pacman -Syu to upgrade the system.
