

LinHES - Bug # 219: Hardware settings, new tuner

Status:	Closed	Priority:	Normal
Author:	mjl	Category:	
Created:	02/24/2009	Assignee:	
Updated:	02/26/2009	Due date:	
Description:	<p>Added a pc3000 tuner card prior to upgrade. Nothing was detected for it that I can determine. System hangs on to my HDHomeRun box which does not play nice with R6.</p> <p>Using alt s, dropped the HDHR and added the pc3000, rebooted, (menu reboot choice doesn't work).</p> <p>Audio level extremely low using pc3000 and the default alsa drivers.</p>
