

LinHES - Bug # 221: Video file playback broken - seems to be mplayer related

Status:	Closed	Priority:	Normal
Author:	tjc	Category:	
Created:	02/25/2009	Assignee:	cecil
Updated:	03/20/2010	Due date:	
Description:	Removing the default video player setting for mplayer and allowing it to use the builtin player seems to work for me (over a limited sample size).

Tailed mythfrontend.log with default settings and this was the output after trying to watch the video:

```
sh: mplayer-resumer.pl: command not found
```

02/26/2009 08:02 pm - nqe2

My system consists of a master backend and a frontend. When I told the install that the system type was master backend it loaded mplayer-resumer.py -fs...etc. by default. When I did the frontend install and said that the system type was frontend only, it loaded mplayer -fs....etc.

```
pacman -Sy
```

```
pacman -S linhes-scripts
```
