| **Description:** | Title says it all. Here is a pretty generic one to use: | | |

<code>
# for a full list of options, see http://www.mplayerhq.hu/DOCS/man/en/mplayer.1.html
# or http://tivo-mplayer.sourceforge.net/docs/mplayer-man.html

heartbeat-cmd="xscreensaver-command -deactivate > /dev/null" # disable xscreensaver while playback is active
monitoraspect = "16:10" # set your monitor aspect ratio
subfont-autoscale=1 # scale osd fonts proportional to movie height
# osdlevel=3 # enable the display timer + percentage + total time by default
# uncomment the above line if you want these displayed for every file
</code>

## History

**03/01/2009 06:48 am - graysky**

I should point out that I'm not sure if the heartbeat-cmd to disable xscreensaver is still current w/ the svn release that's included in both the standard R6 as well as the R6-vdpau package...

**03/01/2009 12:04 pm - tjc**

16:10 isn't generic. This is a good thing to drive from tweaker or other configuration settings which know the correct aspect ratio for the display.

I've marked this as related to the missing xine config since they should probably both be generated from some kind of template files at the same time.

**03/01/2009 01:23 pm - graysky**

Sounds good, tjc. Thanks for the follow-up.
