LinHES - Bug # 312: 2GB for / is insufficient

Status:	Closed	**Priority:**	Normal
Author:	Human	**Category:**	
Created:	03/26/2009	**Assignee:**	jams
Updated:	12/25/2011	**Due date:**	12/31/1969
Description:	The installer lets you choose a / partition as low as 2GB, but this leads to various symptoms on post-install reboot as there is not enough space. The symptom I saw was that, while X started, MythTV did not. /home/mythtv/.fluxbox/apps was empty. Switching to a 3GB / partition fixed the problem. Immediately after mythtv started running, I did a df, and 2.0GB was already in use on /.		
	The immediate fix is obvious; don't allow 2GB / partitions.		
	I would have fixed this myself, but I couldn't find a separate file for mythvantage's menus, and the menu options appear to be built into the mythvantage.bin binary.

When first started 1GB was enough. The price of feature creep.
