

LinHES - Bug # 323: No WPA support for wireless on initial installation

Status:	Closed	Priority:	Normal
Author:	bzlImage8	Category:	
Created:	04/11/2009	Assignee:	jams
Updated:	12/25/2011	Due date:	12/31/1969
Description:	There is no WPA, WPA2 support for wireless networks on the initial installation, so the users with access points having this kind of security will be unable to install, since the installation procedure downloads files from the internet.

wpa will be added at some point, but not for sure when.

The installation should have all that it needs on the cd. If it doesn't then thats another bug all to itself.

WPA & WPA2 seems to work, but it's still in testing mode.

Also added support for interface ath0

12/25/2011 03:10 pm - jams

- Target version changed from 8.0 to 6.00.04
