LinHES - Bug # 359: Presets for ffmpeg libx264 encoding needed

Status:	Closed	**Priority:**	Normal
Author:	mihanson	**Category:**	
Created:	05/17/2009	**Assignee:**	cecil
Updated:	12/25/2011	**Due date:**	12/31/1969
Description:	ffmpeg has libx264 encoding presets available in the [[http://www.ffmpeg.org/download.html|SVN source code]]. They are in the directory "ffpresets" and are usually installed in ${prefix}/share/ffmpeg or alternately in ~/.ffmpeg. LinHES lacks these presets, but I feel they should be included to aid with ffmpeg video encoding as documented [[http://rob.opendot.cl/index.php/useful-stuff/ffmpeg-x264-encoding-guide/|here]].
