LinHES - Bug # 382: ddcprobe missing

Status:	Closed	**Priority:**	Normal
Author:	GregFrost	**Category:**	
Created:	06/09/2009	**Assignee:**	jams
Updated:	12/25/2011	**Due date:**	12/31/1969
Description:	mythinstall (MythVantage) calls /sbin/ddcprobe when the advancedX menu is used. /sbin/ddcprobe is not available. I have been trying to work out where the source for ddcprobe can be obtained withou luck so far.

Here is a package I put together that may do the trick:

06/09/2009 08:26 am - GregFrost

jams: could you try this package to see if the ddcprobe works with your MythVantage.

06/09/2009 08:48 pm - cecil

sudo pacman -Sy xresprobe. I've also ensure it is a dep of LinHES-config.

06/10/2009 03:23 pm - jams

Install ddcxinfo and not xresprobe.

06/11/2009 06:23 pm - GregFrost

We now have ddcxinfo (which LinHES-config depends on), ddcxinfo-arch and xresprobe. Shouldn't we remove the ones that we dont require to aviod possible future confusion. The beauty of a project like knoppmyth/linhes is that you have a coherent way of doing things. Having these three packages violates that.
