

LinHES - Bug # 392: guide data download not required prior to watching TV

Status:	Closed	Priority:	Low
Author:	Human	Category:	
Created:	06/16/2009	Assignee:	jams
Updated:	03/25/2010	Due date:	
Description:	<p>In R5.5 and earlier versions, the download of channel guide data was semi-parallel, in that one day of guide data would be downloaded in series with the rest of the post-install setup, and the rest would be downloaded in parallel. This was the fastest it could be without allowing a new user to see "Unknown" show up for all their shows.</p> <p>In R6, the channel guide download is 100% parallel, allowing users to watch live TV or go to the guide before data is available for the present day. They will see "Unknown" a lot.</p> <p>Perhaps the best solution is to pop up some text that explains that until guide data has a chance to load, some shows may appear as "Unknown." This will likely be faster than downloading a day of guide data in series, and it is more informative in case users skip ahead to see shows that are coming up later in the next two weeks.</p>
