<b>Updated:</b>	12/25/2011	<b>Due date:</b>	12/31/1969
<b>Description:</b>	<p>Just discovered that ntfs-3g USB devices cannot be accessed by mythtv.</p> <p>When I plug in an external USB drive formatted as ntfs-3g (i.e. a new drive I neglected to reformat as FAT32 or normal NTFS)</p> <p>udev auto-mounts it under /media/usb1 but it will not show up like other devices in Watch Videos &gt; Media in xshell, ls /media/usb1 returns Permission Denied.</p> <p>root can access it fine and I can play videos from the device in mplayer as root.</p> <p>ntfs-3g has been added to archlinux AUR (ntfs-3g-ar 2009.4.4AR.1-1)</p> <p>Not sure if this wold solve the problem but all the google hits I've followed suggest it will.</p> <p>Don't want to install it without recommendation from Cecil or another maintainer</p>
