

LinHES - Bug # 440: No Wall Message on poweroff, reboot, etc.

Status:	Closed	Priority:	Normal
Author:	alien	Category:	
Created:	07/17/2009	Assignee:	
Updated:	07/17/2009	Due date:	
Description:	<p>The wall message on shutdown only happens if shutdown is called directly. Other methods of shutdown/reboot (poweroff, halt, reboot, etc.) do not result in a wall message.</p> <p>For machines that are not on 24/7 (ex. mythwelcome users), it is kind of annoying to have it silently shutdown when logged in remotely. It appears like a connectivity issue rather than a shutdown/reboot.</p> <p>The fixes are</p> <pre>/sbin/reboot-runit: <code>#!/bin/sh wall "System will reboot NOW" runit-init 6</code></pre> <pre>/sbin/halt-runit: <code>#!/bin/sh wall "System will shutdown NOW" runit-init 0</code></pre>
