LinHES - Bug # 440: No Wall Message on poweroff, reboot, etc.

Status:	Closed	**Priority:**	Normal
Author:	alien	**Category:**	
Created:	07/17/2009	**Assignee:**	
Updated:	07/17/2009	**Due date:**	

Description:	The wall message on shutdown only happens if shutdown is called directly. Other methods of shutdown/reboot (poweroff, halt, reboot, etc.) do not result in a wall message.
	For machines that are not on 24/7 (ex. mythwelcome users), it is kind of annoying to have it silently shutdown when logged in remotely. It appears like a connectivity issue rather than a shutdown/reboot.
	The fixes are
	/sbin/reboot-runit:
	<code>#!/bin/sh wall "System will reboot NOW" runit-init 6</code>
	/sbin/halt-runit:
	<code>#!/bin/sh wall "System will shutdown NOW" runit-init 0</code>
