LinHES - Bug # 464: Add mutt / other e-mail programs to LinHES repository

Status:	Closed	**Priority:**	Normal
Author:	langelgjm	**Category:**	
Created:	08/01/2009	**Assignee:**	jams
Updated:	03/27/2010	**Due date:**	
Description:	If possible, it would be nice to have mutt or other command line e-mail tools added to the LinHES repositories.		

There are discussions in the forum relating to several options for sending e-mail from the command line in 5.5, but I can't seem to find any of the necessary packages in R6. I've looked for mutt, ssmtp, procmail, qmail, even sendmail (shudder).

/usr/bin/mail is installed, but I guess it does nothing without sendmail or another MTA.

mailx is also apparently installed, but has no binaries that I can find...
