

LinHES - Bug # 472: NFS not unmounted during sytem reboot/shutdown

Status:	Closed	Priority:	Normal
Author:	uteck	Category:	
Created:	08/03/2009	Assignee:	jams
Updated:	03/20/2010	Due date:	
Description:	Reboot/shutdown hangs while trying to unmount network drives. This is due to the network interface being shutdown before the NFS mounts are unmounted. System hangs for 60 seconds until it times out.
