

LinHES - Bug # 485: local website layout and ordering

Status:	Closed	Priority:	Normal
Author:	Human	Category:	
Created:	08/10/2009	Assignee:	cecil
Updated:	03/30/2010	Due date:	
Description:	<p>The "local website" (http://yourlinhesbox) has grown over the years and could use an update along two lines:</p> <ol style="list-style-type: none">1) Item Ordering2) Theme/layout <p>I would advocate separating the links into these categories:</p> <ol style="list-style-type: none">1) MythTV Utils (MythWeb, ipod feed, xvid feed, fuppess, mediasrv, radio, virtual remote)2) MythTV/System Info (MythTV docs, LinHES info, RRDTTool, keybindings)3) Other (Folding Status, My Folding@Home) <p>The naming and ordering of the categories is obviously subjective. If anyone has counter-proposals, please post them.</p> <p>As far as layout, I have nothing specific in mind, but there was an effort years ago to use the same CSS as MythWeb to keep continuity with it. Someone with some CSS experience could probably come up with better ideas than me.</p>

No CSS experience here but I hacked this together to be similar to the MythWeb welcome page using one of the light background MythWeb skins because Tux in the LinHES logo disappears with dark backgrounds. I also added the links mentioned in [\[\[http://knoppmyth.net/flyspray/index.php?do=details&task_id=616|FS #616\]\]](http://knoppmyth.net/flyspray/index.php?do=details&task_id=616).
