

## LinHES - Bug # 499: mplayer-resumer-udpau.pl didn't work for me without a slight change

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	nickca	<b>Category:</b>	
<b>Created:</b>	08/13/2009	<b>Assignee:</b>	
<b>Updated:</b>	08/13/2009	<b>Due date:</b>	
<b>Description:</b>	<p>mplayer-resumer-udpau.pl would fail to properly run udpau-detector, resulting in all videos being played in a window (without -fs, -zoom, etc. options from udpau-detector). At line 135, I changed this:</p> <pre>&lt;code&gt; my \$mplayeropts=`./udpau-detector \$infile`; chomp \$mplayeropts; &lt;/code&gt;</pre> <p>to this:</p> <pre>&lt;code&gt; my \$mplayeropts=`udpau-detector \$infile`; chomp \$mplayeropts; &lt;/code&gt;</pre> <p>udpau-detector is in mythtv's path (/usr/LH/bin), so you don't need to call it with an absolute path like that, plus it doesn't work anyway when because when mythfrontend executes mplayer-resumer-udpau.pl, its working directory isn't /usr/LH/bin.</p>

mplayer-resumer-udpau.pl is deprecated. Please use mplayer-wrapper.pl, which incorporates the logic of mplayer-resumer-udpau.pl. If the wrapper produces the same problem, please file a bug report for it.
