

LinHES - Bug # 516: Install boot fails when selecting default start

Status:	Closed	Priority:	Normal
Author:	lucidblue	Category:	
Created:	08/19/2009	Assignee:	
Updated:	09/08/2009	Due date:	
Description:	<p>When trying to install from the CD, it always dies on normal boot after unsuccessfully trying to create mysql user and group... Then gives 4 options, login as root or mythtv, restart, or shutdown.</p> <p>When selecting the "debug options" during initial boot screen, then selecting "copy-to-ram", it works fine.</p> <p>After finding that it worked that way, I didn't try other options.</p> <p>thanks, LB</p>
