LinHES - Bug # 516: Install boot fails when selecting default start

Status:	Closed	Priority: Normal
Author:	lucidblue	Category:
Created:	08/19/2009	Assignee:
Updated:	09/08/2009	Due date:
Description:	When trying to install from the CD, it always dies on normal boot after unsuccessfully trying to create mysql	
	user and group Then gives 4 options, login as root or mythtv, restart, or shutdown.	
	When selecting the "debug options" during initial boot screen, then selecting "copy-to-ram", it works fine. After finding that it worked that way, I didn't try other options.	
	thanks,	
	LB
