| Description: | Here's a link to a post on the forums explaining how I made the default LinHES local website more readable on iPhone/similar devices. It's just a simple 2 line addition to index.html and a short new stylesheet. [[http://knoppmyth.net/phpBB2/viewtopic.php?p=123483#123483 iPhone readability local website instructions]] Totally unnecessary, but it's a tiny addition that affects nothing else and only needs to be done once. | | |

- Status changed from *In Progress* to *Closed*

this change no longer applies to localwebsite.

wap.html was added, not for sure it's alot better for iphone usage, but it looks ok on mine.
