LinHES - Bug # 530: Patch for 6200ch that allows for 4 digit channel numbers

Status:	Closed	**Priority:**	Normal
Author:	mihanson	**Category:**	
Created:	09/03/2009	**Assignee:**	
Updated:	02/18/2010	**Due date:**	
Description:	Attached is a patch for 6200ch.c that allows for 4 digit channel numbers. It applys cleanly to the 0.21-fixes version of 6200.c located in the source code on the [[ftp://ftp.knoppmyth.net/R6/sources/mythtv-0.21-fixes.tar.bz2|knoppmyth server]]. Have not tested against trunk. Also adds channel change support for Verizon FiOS QIP6200-2 STB.		

History

Trunk patch now included.

09/03/2009 05:20 pm - GregFrost

shouldnt these patches be submitted to mythtv instead of linhes? Then we could just bump our package version

09/03/2009 06:42 pm - mihanson

Yes, I planned on it, but I need to get my crap together and test more.

I'm not sure what happened, but now my patched 6200ch does not work right. It was working earlier. Grrrr.... :/

09/04/2009 12:16 am - mihanson

Ok, everything is now squared away. I'll submit the trunk patches to mythtv directly, but I don't see the need to submit the 0.21-fixes patch to mythtv because 0.22 is about to be released. Attached is the latest and greatest 6200ch.c patch for 0.21-fixes.

09/04/2009 08:19 pm - mihanson

New patch for 6200ch.c against raw code at ftp://ftp.knoppmyth.net/R6/sources/mythtv-0.21-fixes.tar.bz2

09/04/2009 08:59 pm - mihanson

New patch for 6200ch.c against http://linhes.org/repo/src_packages/core-testing/mythtv-0.21-81.src.tar.gz after running makepkg.
