LinHES - Bug # 539: MythArchive - ffmpeg - missing libraries

Status:	Closed	**Priority:**	Normal
Author:	techman83	**Category:**	
Created:	09/17/2009	**Assignee:**	
Updated:	10/07/2009	**Due date:**	

Description:	Post pacman -Syu, mytharchive fails
	ffmpeg: error while loading shared libraries: libfaad.so.1: cannot open shared object file: No such file or directory
	ffmpeg: error while loading shared libraries: libx264.so.65: cannot open shared object file: No such file or directory
	For the moment I've linked:
	libfaad.so.1 -> libfaad.so
	libx264.so.65 -> libx264.so.67
	Seems to be working, although linking to incorrect libraries can be quite dangerous! Will look into further later.

I saw a similar error. Doing sudo pacman -S ffmpeg shows that ffmpeg-svn is the correct package. Once I installed that ffmpeg seems to work correctly for me.

The nasty library linking worked last night. Wiped out the symlinks and ran pacman -S ffmpeg, that fixed the issue. Thanks
