

LinHES - Bug # 592: Add Projectx to extras

Status:	Closed	Priority:	Normal
Author:	bigb	Category:	
Created:	12/06/2009	Assignee:	
Updated:	01/14/2010	Due date:	
Description:	Projectx is optionally used by mytharchive to create DVDs with captions. It is used in the demuxing stage.		

History

I'm running the testing repos. I installed projectx today, and i can at least check its version. I get the feeling that this package was already in the repos (well at least in the testing set)

JRE was also installed, i had to `source /etc/profile` to update the path, would be good if the jre package could do this as a post install step.
