LinHES - Bug # 602: Add package for Radeon proprietary drivers

Status:	Closed	**Priority:**	Normal
Author:	paulsid	**Category:**	Packages: Core
Created:	12/20/2009	**Assignee:**	mihanson
Updated:	03/30/2010	**Due date:**	
Description:	Add a package for the ATI/AMD Radeon proprietary drivers, aka catalyst or fglrx. I have a frontend with an older model Radeon card that would not do TV Out properly with the open-source "radeon" driver.		
	I did a source install but there is a package in the Arch AUR called catalyst 9.12-1 that may also work.

I do not have the hardware for this, so someone will need to test it.

confirmed to work with hd4350

03/30/2010 08:05 am - jams

The pkg works, but thought it was worth mentioning that I had to use the QT painter. OpenGL would lock up anytime a QT screen(settings) was loaded.
