

## LinHES - Bug # 632: recstat not working in R6

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	jimdoc	<b>Category:</b>	
<b>Created:</b>	02/28/2010	<b>Assignee:</b>	jams
<b>Updated:</b>	03/25/2010	<b>Due date:</b>	
<b>Description:</b>	Originally posted as "Encoder Status LEDs for KnoppMyth" at <a href="http://knoppmyth.net/phpBB2/viewtopic.php?t=12786">http://knoppmyth.net/phpBB2/viewtopic.php?t=12786</a>  This script allowed LED's to be illuminated via serial port power based on encoder recording status. In previous version of Knoppmyth, serial port support for this script was not included. I used pyserial to get it to work.  This script does not appear to be implemented in R6.		

### Associated revisions

#### 03/25/2010 09:35 am - jams

recstat: initial include. Does not have support for runit  
recstat will need to be modified

ref #632

#### 03/25/2010 10:02 am - jams

recstat: added run file.  
-More cleanup for recstat.py.  
-removed recstat which is used for init

closes #632

I would be happy to add these scripts. Can you attach them? considering they are python I don't want cut/paste to screw with the whitespace. Also the myhtv wiki page isn't found anymore. Do you have the required information from there?

#### 03/21/2010 02:53 pm - jimdoc

- File recstat added

- File recstat.py added

Here are the files.

I don't believe these files (or description) were ever part of the myhtv wiki (not that I'm aware of anyway).

recstat is the script to run the python file. this worked in R5, but I'm not aware of how this gets implemented in R6.

recstat.py is the script that checks for active tuners. this file will need to be edited to reflect the users actual encoders.

Thank you. Let me know if you need any additional info.

Ok I found the mythtv wiki stuff (via archive.org).

I've copied the page and placed a copy at...
