

LinHES - Bug # 681: starting up with boot cd sometimes mysql says fail

Status:	Closed	Priority:	Normal
Author:	martin1802	Category:	Installation/Upgrade
Created:	04/04/2010	Assignee:	jams
Updated:	12/12/2010	Due date:	01/10/2011
Description:	<p>sometime my system starting with bootcd for install process says fail</p> <p>maybe there is a mistake because by default dhcp is enabled for lan (eth0) and my router has not assigned a ip to networkinterface before mysql tries to start up?</p> <p>Maybe it will be nice to select static ip on boot or maybe wait / check until a ip is assigned?</p>

This happens from time to time and it's a known bug.

From what i can tell it doesn't have anything to do with the network.

When mysql starts it's only looking at localhost do static/dhcp wouldn't matter at this point.

Just as a reference point this happens more when using CD's vs USB flash drive.

And never happens for me when using vmware.

> Maybe it will be nice to select static ip on boot or maybe wait / check until a ip is assigned?

static ip's can be setup from the boot menu using ip=x.x.x.x as a boot parm.

At some point this should all be documented.

- Status changed from New to Closed

- Target version set to 7.1

- Estimated time set to 4.00

- Due date set to 01/10/2011

Can't not replicate any more. Logic has been put in place to keep trying (up to 20) if mysql fails to start.
