<b>Description:</b>	<p>mre monitors the espn scoreboard website to see if a sports event is finished or goes into over time. It extends recordings untill FINAL is shown on the scoreboard. Verified with myth.22 and NHL hockey. Changed event monitor to RSS feed hosted locally.</p> <p>mre-1.1.2.pkgbuild.tar.gz depends on PearDB-1.7.13.pkgbuild.tar.gz PearLog-1.12.0.pkgbuilg.tar.gz</p>

Appears I sent the wrong pkgbuild info as that one is only updated for NHL events. This one is updated for NHL, NBA, MLB, and NFL (untested). I tested the other ones. (You don't have to wait for one to go into overtime, just set it to end a half hour early and see if it works. DUH)
