

LinHES - Bug # 770: zoneminder 1.23.3 not compatible with php 5.3

Status:	Closed	Priority:	Normal
Author:	bobmyth	Category:	Packages: Core
Created:	04/18/2011	Assignee:	brfransen
Updated:	09/20/2011	Due date:	
Description:	Using zoneminder 1.23 on LinHes 6.04 give php errors because ereg related functions are deprecated. This renders zoneminder useless. Upgrade to zm 1.24 may fix this, if not replacing ereg with preg_match (5 instances) and split with preg_split (41 instances) will fix the issue.

- Status changed from New to Feedback

- Category set to Packages: Core

I don't use zm so I haven't tested. Please test and report back.

09/20/2011 07:53 pm - bobmyth

I do not have a dev system to try this fix and evaluate. If you applied my original patch, I'm OK with closing this issue. I can open again if needed.
