ttpci firmware is part of dvb-firmware. Is dvb-firmware installed?

10/13/2011 11:22 am - martin1802

I have installed it manual from http://www.linuxtv.org/downloads/firmware/ ...

Did not know if packages is installed ... maybe it is possible to upgrade it from repos ... but in iso standard installation there is no ttpci firmware installed

Sorry ... at the moment it is not possible for me to look into my installed R7.00.03 Beta system ... out from home :-)

dvb-firmware will now be included the next time an image is built:
