| <b>Description:</b> | <p>This is the successor to squeezeboxserver. There is a build for archlinux in aur, but it requires perl&gt;5.15 and LinHES 7.3 has perl 5.12, so that's not a goer.</p> <p>There is a squeezeboxserver package in your repos, but it doesn't work (again my research shows that this may be a perl 5.12 issue.</p> |                  |        |
