Description:	It would be cool to be able to play all the trailers instead of having to select one at a time. Maybe a Play All and a Shuffle?

I've added the requested feature to the latest mythappletrailer that is in the testing repo. It adds Play All Trailers, Shuffle Play Trailers and Play Random Trailer to the menu. Note: When Play All or Shuffle Play is selected, it will play all the trailers. The only way to stop it would be to access the system and killall play_trailer.sh.

Been testing this and it works well. I like the random trailer. High WAF with this addition. I'm trying killall with my remote (blue button on streamzap).
