LinHES - Feature # 867: gd.so php module missing

Status:	Closed	**Priority:**	Normal
Author:	mikavir	**Category:**	Packages: Core
Created:	11/08/2012	**Assignee:**	cecil
Updated:	12/02/2012	**Due date:**	
Description:	The gd.so module is not present in /usr/lib/php/modules/ This module is required, for example, by OwnCloud (owncloud.org). More info in thread: http://forum.linhes.org/viewtopic.php?f=22&t=22846

As instructed, I downloaded ownCloud from aur.archlinux.org, but the problem persists.

Since the gd.so is not in the php modules directory /usr/lib/php/modules/, it's (obviously) missing... Package called php-gd contains only the gd.so module, so I think that LinHES developers could include this package to the repositories.

Mikavir , only speaking for myself but I have no plans to update/fix R7.
With that said R8 does include php-gd. If you have spare hardware or VM feel free to test out the test3.iso file and report back.

The package is now in the testing repo. sudo pacman -Sy php-gd and let us know.

After installation of php-gd ownCloud works :) Thank you Cecil!!!

(VM instance of R8 is underway)

You're welcome. Thanks for being a long time user of KnoppMyth and LinHES!
