LinHES - Bug # 889: Installer in R8 fails while formatting GPT formatted disks

Status:	Closed	**Priority:**	Normal
Author:	brfransen	**Category:**	Installation/Upgrade
Created:	01/02/2013	**Assignee:**	jams
Updated:	01/11/2013	**Due date:**	
Description:	I was able to install after I used gdisk to remove the GPT partition table.

LinHES-config: mv_install, erase both msdos and gpt labels for new installs.   If a gpt label is present the install will fail due to the usage of extended partitions

refs #889

- Status changed from New to Closed

This was caused by the use of extended partitions with a gpt table, which is not supported.

For new installs wipe both msdos and gpt tables, then recreate a msdos type label.

Tested with both msdos, gpt & both gpt/msdos hybrid tables.
