lighttpd:: enforce password across the entire site with the following exceptions:

- 1) access from localhost/127.0.0.1
- 2) port 1337
- 3) the file failed\_func\_hosts

some paths could not be secured because they are used by the system.

Any request coming from 127.0.01 and localhost are allowed through with no password

Additionally any request on port 1337 is allowed
