

LinHES - Bug # 910: xbmc --lircdev /var/run/lirc/lircd is not accepted even when it's hardcoded in R8

Status:	Closed	Priority:	Normal
Author:	RacerX	Category:	Packages: Extra
Created:	03/08/2013	Assignee:	jams
Updated:	08/26/2013	Due date:	
Description:	<p>Since R7.4 and now in R8 a bug exists that breaks Lirc in XMBC</p> <p>Code: Select all</p> <pre>xbmc --lircdev /var/run/lirc/lircd</pre> <p>is bugged, even more strange is the path for Lirc is /var/run/lirc/lircd and not in /dev anymore so it should be working. The only option is to change the button.</p> <p>So here is the workaround for now</p> <p>change the line in</p> <pre>/home/mythtv/.mythtv/library.xml</pre> <p>from</p> <p>Code: Select all</p> <pre><action>EXEC /usr/bin/xbmc</action></pre> <p>to</p> <p>Code: Select all</p> <pre><action>EXEC /usr/bin/xbmc --lircdev /var/run/lirc/lircd</action></pre> <p>it can now figure out the path for Lirc and it works for now :)</p>

LinHES-config: mv_ir.py add support for custom xbmc lirc mapping. If a remote definition has a xbmc.xml file it will be symlinked for xbmc usage.
