

LinHES - Feature # 936: Copy system_backups to a second disk if there is one

Status:	Closed	Priority:	Normal
Author:	brfransen	Category:	Packages: Core
Created:	11/12/2013	Assignee:	brfransen
Updated:	11/12/2013	Due date:	
Description:	Currently the automated system_backups are stored on the data partition of the boot disk. If the boot disk fails the database partition, home partition and data partition could be lost. If there is a second disk on the system that was added using add_storage.py then a copy of system_backups will be created on the second disk.
