<b>Description:</b>	I'm trying to figure out why it is that Amazon Instant videos won't play and it seems to be related to DRM and the missing HAL. It looks like hal and libhal are all that is needed to get this working again. This is from forum post: <a href="http://forums.linhes.org/viewtopic.php?f=21&amp;t=24009">http://forums.linhes.org/viewtopic.php?f=21&amp;t=24009</a>

hal & hal-info: rebuild for R8. refs #970

### History

**06/05/2014 09:40 am - brfransen**

- *Tracker changed from Bug to Feature*

**08/19/2014 11:52 am - jams**

HAL is considered end of life so it was removed from R8.

However I did not realize that it was needed for flash DRM so hal will be added back for 8.2

**08/19/2014 11:52 am - jams**

- *Status changed from New to In Progress*

- *Assignee set to jams*

**09/21/2014 11:58 am - brfransen**

- *Target version set to 8.2*

- *Category set to Packages: Extra*

**10/05/2014 06:57 am - brfransen**

- *Status changed from In Progress to Closed*

Built and pushed to repo but I have no way to test
