LinHES - Bug # 985: Missing shared libraries for zoneminder

Status:	Closed	Priority:	Normal
Author:	bobmyth	Category:	Packages: Core
Created:	12/22/2014	Assignee:	brfransen
Updated:	01/26/2015	Due date:	

Description:	Zoneminder is not working properly, this is the first clue I could find that may be causing the issue:
	
	 $ ldd /usr/bin/zmc | grep -i found
	     libavformat.so.54 => not found
	     libavcodec.so.54 => not found
	     libavutil.so.51 => not found
	
	 There are newer version of these libraries on the system so recompiling zoneminder to use these newer libraries may resolve the issue.
